

S9

the ideal modular upgrade

Four versions accommodate most upgrade requirements:

- Meets all the latest security standards
- Visa-approved PIN entry
- Certified for Triple DES
- EMV4.0 type approved and compatible with Hypercom Crypto Processor (HCP)
- New easy-to-hold ergonomic design fits comfortably in customers' hands

S9

the ideal modular upgrade

Hand-Over Design Fights Fraud

The new Hypercom® S9 ensures security by letting customers always keep their credit or debit cards. Cardholders simply pick up the ergonomic S9 hand-over unit, swipe their card and enter a PIN, if needed. No need for cashier assistance.

Rock-Solid Security

The S9 incorporates the most secure criteria in electronic transaction technology globally, including new EMV standards. Easy-to-read user interface has an illuminated display and oversized, colored OK and CANCEL keys.

Reads Both Smart and Magnetic Stripe Cards

Regardless of whether customers use magnetic stripe or smart card technology, three models of the cost-effective S9 accommodate both technologies and card readers are co-located to avoid user confusion. Model S9 is a PIN pad only. Model S9C is a PIN pad/terminal reading magnetic stripe cards. Model S9S is a PIN pad/terminal reading smart cards. Model S9SC is a PIN pad/terminal reading both smart and magnetic stripe cards. The smart card reader on all models accepts 3V and 5V cards or economic 3V-only cards.

Fully Compatible

The S9 features Hypercom plug-and-play software and replaces all Hypercom PIN pads including the S1, S7 and S8 families. As a PIN pad, the S9 is fully compatible with all Hypercom terminals from the T7 series through the ICE™ family. It is Triple DES certified and EMV4.0 Type approved. Also Visa approved.

Specifications:

Display

LCD: 2 x 16 characters
Backlight: 25,000 hours (calculated)

Keypad

Membrane: 16 silicone rubber keys

Card Reader

Magnetic Stripe Reader (optional):

Tracks 1, 2 (standard)

Tracks 2, 3 (optional)

400,000 reads (calculated)

Smart Card Reader (optional):

EMV4.0 certified; ISO 7816; non-captive;

3V and 5V cards; two 5V SAMS

Communications

PIN Pad Port: RS-422 PIN (standard),

RS-232 3-wire (optional)

Power

12 V, 100m A (standard)

Security

Physical: Visa PED approved; Intrusion detection, encryption coprocessor

PIN Encryption

DES: Visa PED approved; PIN-ANSI 9.8, MAC-ANSI 9.9,

PART 1-ANSI 9.24, Triple DES
